

Instruction Guide for Design Management

How to Manage Your Designs?

Connect to your Dashboard...

Manage designs in Dashboard (Add, Modify, delete designs)

A screenshot of a web form titled "Sign in to your Account". The form contains two input fields: the first is for a username, containing the text "XYZ" and a user icon; the second is for a password, containing four dots and a lock icon. Below the fields is a blue "Sign In" button.

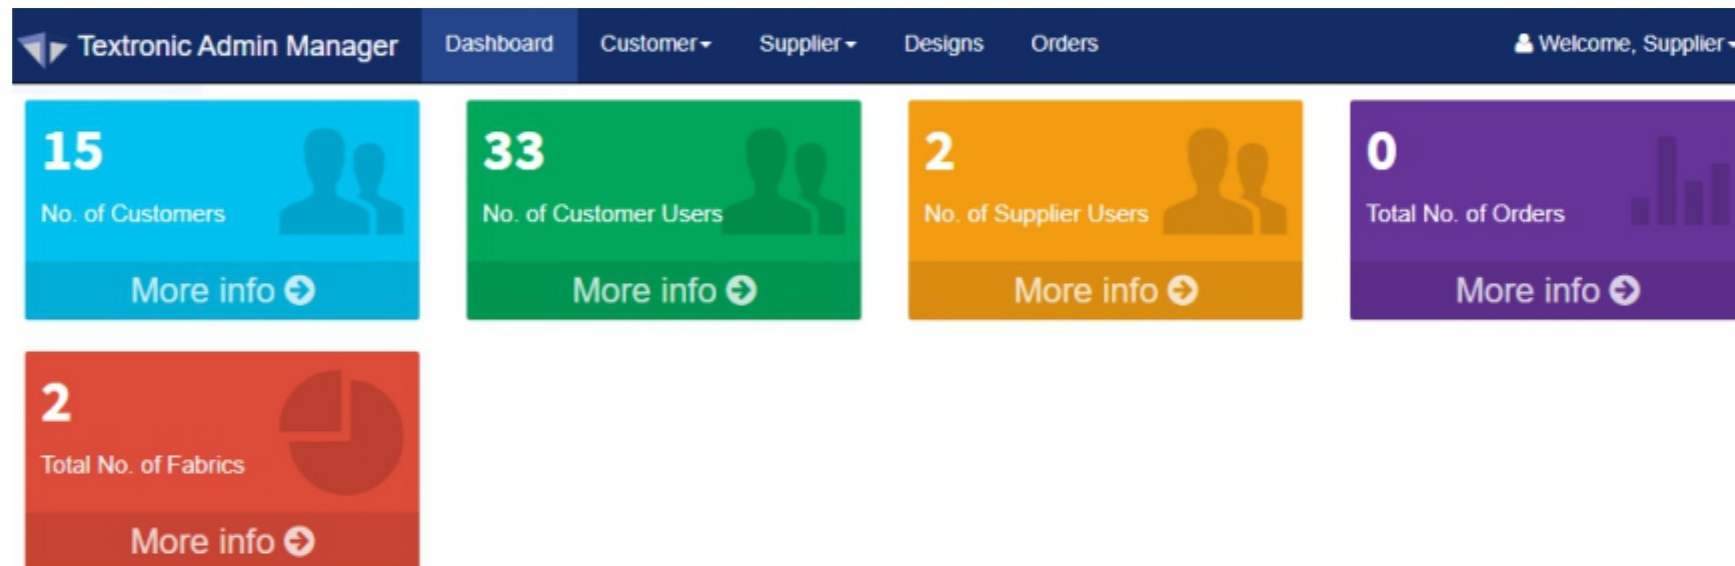

Dashboard URL : <https://url/Dashboard>

User ID : userid

Password : *****

You are in Home Page ...

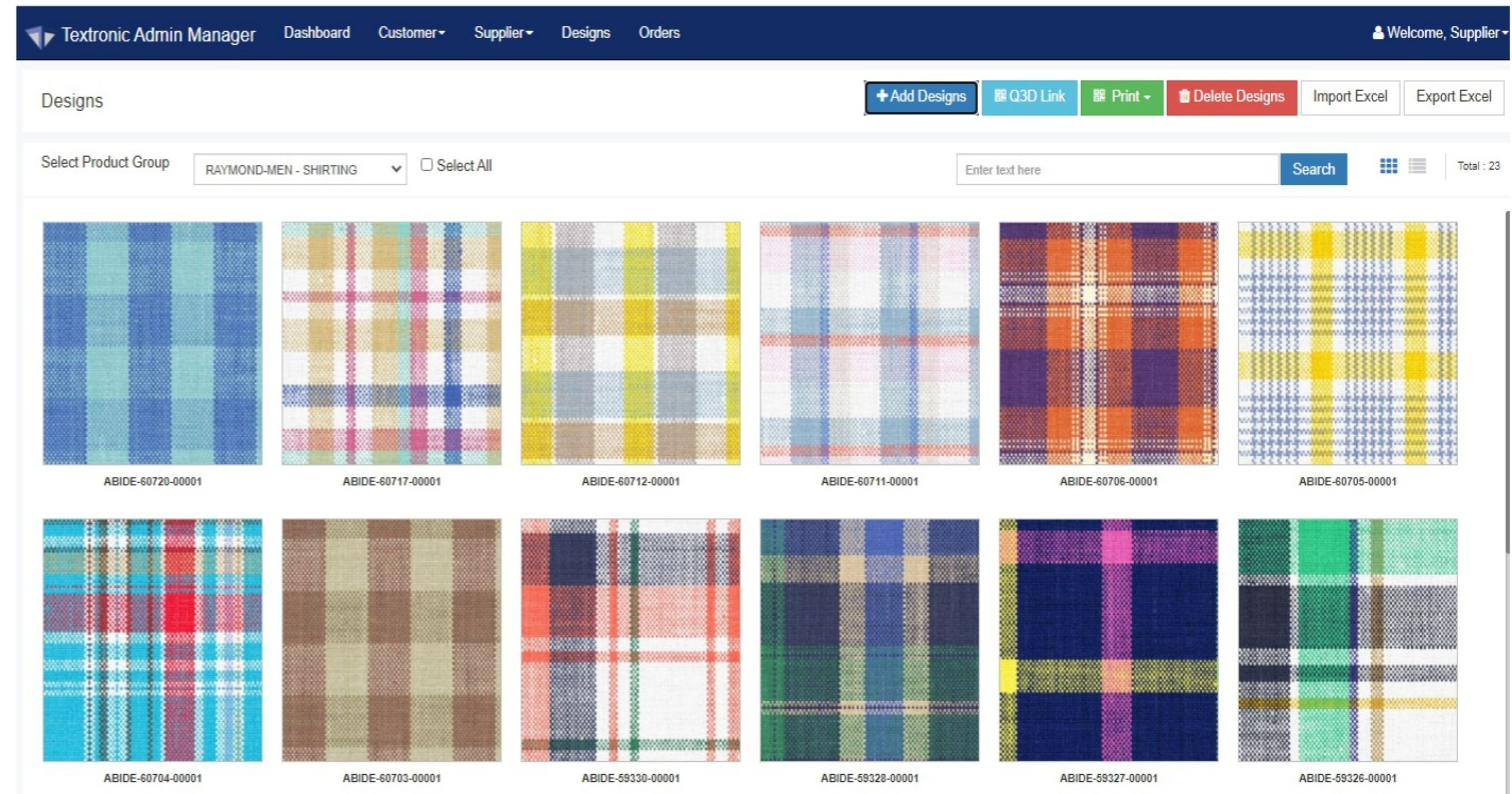

After Supplier effectively signs in to the dashboard, they will be welcomed with the showcase underneath - (Customer and Supplier module details are already shared in separate document)

You are in Design Module...

Manage your Design

- Add Design
- Q3D Visualization
- Print (QR Code and Design)
- Delete Designs
- Import / Export Excel
- Edit Designs

How to add designs ?

- **Add Design**

Click on 'Add design'

Add Designs [X]

Product Group: RAYMOND-MEN - SHIRTING Warehouse: CAD Select Customer: [Select Customer]

Crop Design

Click on crop design icon, underneath page will get show

Crop Design features....

- Various options are present in crop design

- User can crop repeat pattern in design as shown below

Design Size Standards

Correct in size & proportion

The dimensions of texture must be 100% identical to the original fabric pattern

Image resolution

The resolution of the texture must be at least 300 dpi (600 Good)

Image file format

The file format must be .png, .jpeg

Image size

- For solid repeats

The texture size must be at least 10 x 10 cm (DPI 300 Width : ... Height : ...)

- For Yarn Dyed / Woolen melange, Linen repeats

The texture size must be at least 20 x 20 cm (DPI 300 Width : ... Height : ...)

- For Yarn Dyed plaid, stripe & multicolour repeats The

texture size must be at least 1 repeat (DPI 300)

Design Sizes

Working with CAD

- Allow to upload CAD files Textronics (DOB/ DSN/ DSK)/ Penelope (MDB) / TEXCAD (DES/DSN/JPG)/ MOST DOBBY (DBY).
- Allow to upload image files -JPEG,PNG
- Generate Simulation Images as per DESIGN SIZE STANDARD

Working with Scanned

- Scan Fabric at 600 DPI / 720 DPI
- Perform Color Corrections
- Crop and Make Repeat Image as per DESIGN SIZE STANDARD

Working With Camera

- Capture Fabric
- Do Color Corrections
- Setup DPI (600 / 720) and Real Size (when we do scan, we get dpi so we found real size in INCH/CM but camera picture give at default DPI72/75/150/300 so we could not found real size in inches)
- Crop and Make Repeat Image as per DESIGN SIZE STANDARD

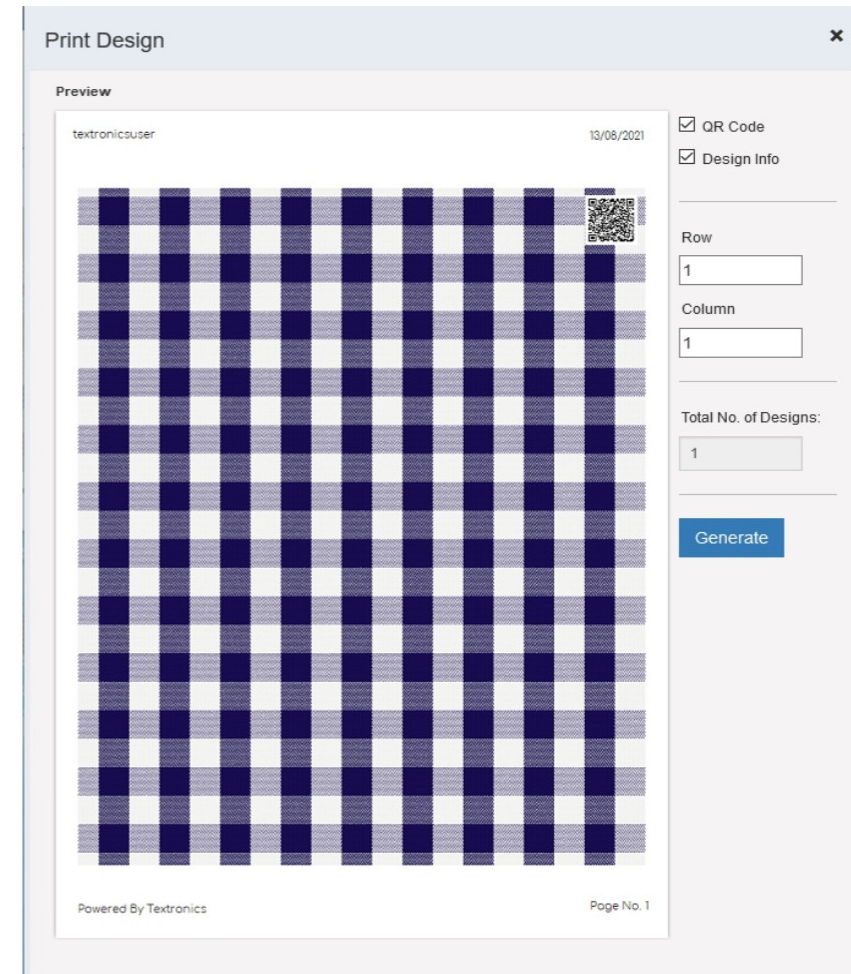

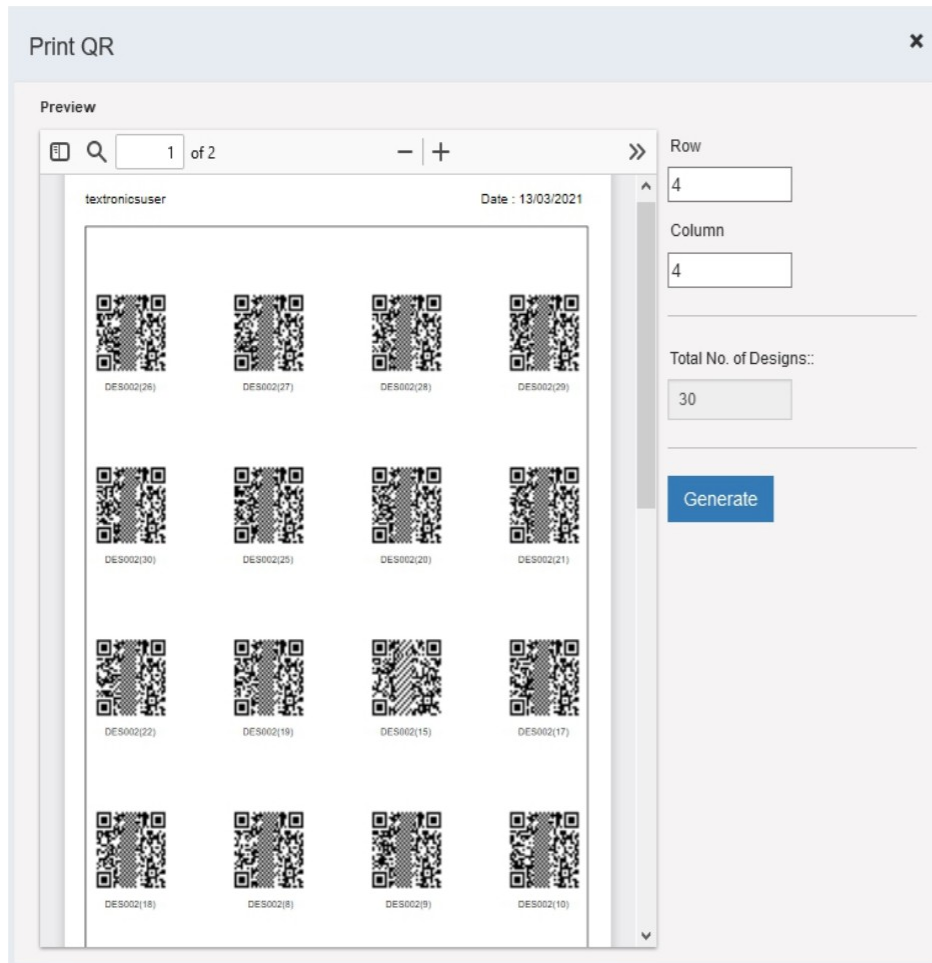

Upload Design Size Limit

- Single Design 5 Mb (max)
- Bulk upload 50 designs (size upto 50 Mb) at a time.

- **Q3D Link** - Generate QR code for multiple designs.

- **Print** : QR print and Print design is available. Either you can print only QR or QR with design. We can download 'Pdf' for the same or give 'print' for 'Print QR' and 'Print Design'.

- **Delete** : Delete number of fabric designs.
- **Import Excel** : You can Import design property of multiple designs in excel sheet
- **Export Excel** : Designs which are uploaded can be exported in excel sheet with design property details (date-wise)

Other Design options...

Hover your mouse over the thumbnails to view design options
